

One of these firewood piles is infested with Emerald Ash Borer.

Can you tell which one?

**Most people can't. So please
KEEP FIREWOOD LOCAL!**

- Emerald Ash Borer (EAB) lives hidden beneath the bark of ash trees and can be transported in firewood.
- Due to discoveries of EAB in Wisconsin, a firewood quarantine is in place in 6 counties: Crawford, Fond du Lac, Ozaukee, Sheboygan, Washington and Vernon.
- Hardwood firewood may not be moved out of the quarantine area.*
- Stop moving firewood within the quarantine areas or anywhere in Wisconsin to help avoid spreading EAB or other pests and diseases.

** Firewood certified by DATCP may be moved within Wisconsin. Certification available for businesses only.*

***Buy it where
you burn it!***
